A decent unit with some fundamental misses

Reviewed in the United Kingdom on 1 January 2022

Been thinking about a new sound at for a while, my existing LG soundbar and wireless sub being approx 7 years old and starting to look it's age. I had considered the K2 but when I saw the Sierra plus with Dolby Atmos and wireless sub I decided to take the plunge. I have a blowfell for the kitchen TV and a few other majority products so I know the quality is good.

The unit arrived next day via Amazon and after a quick unpack, as I now expect with majority, I went online to check the instructions as none are included in the box. Nothing out of the ordinary, connects via HDMI arc exactly as my outgoing LG sound bar, with auto connect on the wireless sub. For extra convenience, the holes from the wall brackets on the LG bar were the same as those for the included wall brackets for the Sierra. Easy swap over and plug in and it was all up and running in under 10 mins.

Initial impressions are that the bar itself is quite large, looking quite imposing under my 65"

Sit down - get a cuppa this is a long one...(For a summary scoot down to the bottom)
Firstly - Be in to get this delivered - its a beast of a box (the picture shows it) but its very sympathetically packaged. Give yourself some time to get the feel of it.. you won't set this up in 5 mins - it's not hard just requires thought.

We set it up in the kitchen first to give it a try. (Hence the tea cosy backdrop!)

Plugged in...and it wakes up with a nice Welcome message - takes about 10-12 secs to wake up fully.

The Wireless Subwoofer was a dream - turn on... and it connected seamlessly (Top marks!)
On the back is ARC, HDMI1 and HDMI2 - Now this was extremely important for us (more later)

Its a big bar.. its almost 50mm high and my Sony TV has a low profile... so I had to create a foot for the back of the TV to make it stand above it.. That's not a negative.

The unit comes with mounting brackets for a wall - nice touch.
